World Book Encyclopedia 2010

**The magnificent 22 volume print set specially written for
12 to 20 year old students**

Studies have shown that students using print sources read faster; have a higher interest level and a higher comprehension rate than students reading the identical material from a computer screen

Did you know that World Book's 3800 editors and contributors for the 2010 edition are the very best in reference publishing. They believe it isn't enough to be knowledgeable in their subject; they also have to be able to write articles that are easy to understand

Teachers and librarians consistently rank World Book Encyclopedia as the best general reference source for **Upper KS2, P7-S1, through to FE**. Apart from being able to answer virtually any query a student may have, here are 3 more reasons why it is the best for 12 to 20 year olds:-

- 27,500+ photographs and illustrations combined with comprehensive highly readable text to appeal to a broad range of readers. 100's of new maps including maps that show mountain ranges on earth and on other planets
- Ideal for classroom research projects, World Book supports the National Curriculum.
- Since 2009 edition, there have been over 3000 new or revised articles and more than 5000 pages revisions. World Book revision rates make it the most current and up-to-date encyclopedia available

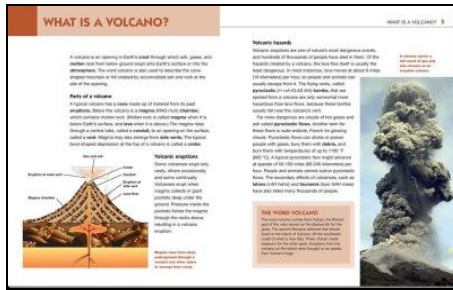

What reviewers say

- "an outstanding, beautifully illustrated, general reference source.....offering high-quality, current, accurate information in an attractive package, World Book continues to be a first choice for libraries, schools, and homes" *Booklist*
- "The best encyclopedia is the one that gets used...and World Book has expended much effort studying the habits of readers, school curricula, and patterns of classroom use to ensure that this encyclopedia is one that will indeed be used" *Reference & Research Book News*
- "The World Book Encyclopedia is a first choice for libraries and schools"
